

“The insight gleaned from longitudinal data systems is essential to making informed decisions about programs, practices and measuring the effect of various factors to improve educational outcomes.”

— ARMISTEAD SAPP, GENERAL MANAGER OF SAS' EDUCATION PRACTICE

Where gaps in learning no longer exist.

For three decades, SAS has been helping organizations integrate and analyze historical data across various systems in order to simplify data sharing and enable proactive decision making. SAS is committed to utilizing this expertise in building educational longitudinal data systems that would empower evidence based decision making to improve student learning and achievement.
