

# Extending Your Educational Reach

Tandberg, now part of Cisco, provides a secure infrastructure for robust video communication.

Tandberg's Grant Services Team offers expert assistance to school districts in locating and securing funding opportunities. Tandberg consults with school districts to provide information and needs analysis to help ensure funding success. For more information visit [www.tandberg.com/grantservices](http://www.tandberg.com/grantservices).

Schools are under continuous pressure to deploy more and more advanced technologies to keep up with today's learners. Schools must enable learning experiences consistent with the constantly advancing technological landscape in the work force, commerce and social networks. Video communication is making it possible — and Tandberg is leading the way.

Tandberg video communications help connect students with endless educational opportunities via distance learning, virtual fieldtrips, archived podcasts of lectures and lessons, virtual office hours, clinical applications like speech therapy and integrated video in online classrooms and newsfeeds.

In addition, school districts can extend their budgets and student reach by offering classes via video to students in underserved or rural areas or to homeschooled students. Students access teachers and subjects that they might not otherwise have in a more traditional setting. Foreign languages, advanced mathematics, and science and cultural history courses can be taught to multiple campuses simultaneously.

Interactive video communication, remote access and airtight security have become mandatory for schools that wish to offer their students the best educational advantage. Tandberg offers districts the secure, flexible infrastructure necessary to run cutting-edge distance learning programs.

# TANDBERG

TANDBERG is now part of Cisco.

Cisco TelePresence powers the new way of working, where everyone, everywhere can be more productive through face-to-face collaboration. From the boardroom, to the office and customer-facing environments, and to the home, Cisco TelePresence spans a complete, innovative endpoint portfolio, an integrated architecture, any-to-any standards-based interoperability, and user-friendly features, such as one-button-to-push and continuous presence.
