

Ready for Anything

Infrastructure is technology that your school will live with for a long time. Whether you make upgrades and additions as needs evolve or you make sweeping changes, the infrastructure decisions you make now will affect your ability to meet the needs of students, educators and administrators for years to come. Good planning and execution of infrastructure projects will also minimize the fiscal impact to your institution now and in the future. That's why you need a partner who has the knowledge and experience to help you get the most from your infrastructure.

GovConnection can help you assess your current infrastructure, and design and build solutions to help you meet your school's needs while helping you minimize maintenance and operating costs. As a Cisco Gold Certified Partner, GovConnection has the highest level of expertise in Cisco infrastructure products, such as

networking, data center, security and communications technologies. And GovConnection's long-standing service in the education sector means we understand your needs and challenges. To attain Gold Certification from Cisco, GovConnection has invested heavily in the training and expertise of our staff and achieved consistently high levels of customer satisfaction. So you can rest assured that our proven track record, experienced account managers, public-sector and education contract expertise, and access to dedicated Cisco professionals and resources will provide you with the robust, cost-effective solutions that are right for your school.

No matter what your current infrastructure looks like, we can help you minimize costs, improve disaster recovery and security, reduce your environmental impact, and improve and expand your capabilities.

Across the Entire Infrastructure

GovConnection can help you achieve the best solutions for a wide range of objectives, including:

- **Unified communications** — Unified communications can improve collaboration among students, teachers and other faculty, and facilitate mobile solutions.
- **Wired and wireless networking** — Make sure your network is ready to meet the constantly evolving needs of end-users in the classroom and throughout your institution.
- **Data center consolidation and virtualization** — Limit data center sprawl, reduce operational expenses and decrease power consumption.
- **Data center and storage networking** — Ensure your back end is up to speed as computing and storage needs grow.
- **Disaster recovery services** — If the unexpected occurs, make sure students and faculty can continue to access resources for their educational and administrative needs.
- **Security** — Keep malicious traffic off your network and enable remote access to educational and administrative tools.

GovConnection, Inc. 800-800-0019 is a rapid-response provider of IT products and services to federal, state, and local government agencies and educational institutions through specialized account managers, catalogs, and publications, and online at www.govconnection.com.
